

Resolved Issues in Various Patches from 15.0.3 to 15.1.2.6369

Resolved Issues:

184266 -- Deadlocks occur when multiple people are doing data entry.

201654 -- Foreign Key Constraint errors occur when deleting Website from the Recycle Bin if the same named Website existed previously on the Target WCM Server.

213487 -- Cursor disappears in WCM Password field when trying to login to WCM site.

215641 -- When updating a customer type from a nonmember type to a member type (or vice versa) the SQL that runs contains unlinked tables.

186195 -- After saving a query, the folder tree refreshes and collapses to a folder other than what's displayed in the top bar and the list of files in the right pane.

188790 -- The Lister2 control is out of sync with respect to sort column / direction on certain queries in the system.

189056 -- Listings for committees in the directory does not increment paging correctly.

193183 -- When a webpage uses a Lister and displays only a certain number of the total results, the link at the bottom of the page incorrectly asks to show just that certain number when instead it should ask to display the total number of results.

197851 -- An older table ASI_Temp_Trans is being rebuilt when upgrading.

155219 -- The purge script does not include the i15 tables. (15.1.1.3286)

156307 -- Unable to delete application server entry from Set Host Location in iMIS15 (15.1.1.3286)

157980 -- The Membership Purge for MS SQL script description needs additional detail. (15.1.1.3441)

159316 -- An error is returned when Committee Export reports are requested for a SQL 2005 database set for compatibility mode 90. (15.1.1.3508)

159426 -- If the user enters a new child record for a company with a custom company sort, the company sort field will be put back to default. (15.1.1.3286)

160364 -- Entry of a Dues product code is allowed in the AR/Cash > Enter/Edit Sales Transaction line items. (15.1.1.3508)

160421 -- Customer receives member pricing from event web view registrations when Name.STATUS is not Active. (15.1.1.3064)

160536 -- Cloning a meeting with an event code that begins with a number and contains a letter will get a syntax error. (15.1.1.3152)

160671 -- Customer Portfolio shuts down if loading a fundraising transaction that has an alphanumeric receipt number. (15.1.1.3441)

161716 -- CEU Type lookup does not appear until you click in the CEU Type field. (15.1.1.3441)

163272 -- Custom Crystal Dues Renewal Notices may not contain complete data when a dues billing is run. (15.1.1.3441)

167690 -- The Product Featured menu item on the left nav menu of Store Home needs to be removed. (15.1.1.3286)

169300 -- Exhibition functionality available without license. (15.1.1.3286)

171774 -- When you use Cart Manager to remove entries from the cart, the associated entry in the OrderCheckout table is not removed. (15.1.1.3441)

173945 -- Unable to change passwords in User Credentials page. (15.1.1.3508)

175222 -- CP Error Occurs When Saving Address with Missing Zip Code in ZIP Code Table When Accumail is Installed. (15.1.1.3152)

183317 -- In a User Defined window, the Change Log is recording changes to fields of type Number when their value has not actually changed. The logged values are also being shown in monetary format. (15.1.1.3508)

185515 -- On templated sites on Firefox, content blocks appear in the wrong place. (15.1.1.3286)

- 185528** -- Campaign Summary tabs UI issues. (15.1.1.3286)
- 185679** -- Error editing permissions for long userid. (15.1.1.3286)
- 186294** -- Security is not properly checked when editing an object using SmartControl. (15.1.1.3286)
- 186929** -- Process Manager > Generate Reports opens to \$/OpportunityManagement/Default System/Reports as opposed to ReportsView. (15.1.1.3286)
- 187670** -- The Save and Reset buttons do not match when viewing User Defined fields in Public View. (15.1.1.3152)
- 187825** -- When the 1505 templated site is viewed on Firefox, navigation blocks appear in the wrong place. (15.1.1.3286)
- 187939** -- Using Organize to cut/paste query's location causes error (15.1.1.3286)
- 188195** -- Process Type List does not sort in alpha-order. (15.1.1.3152)
- 188317** -- html content that contains more than 8192 characters will cause a publishing error. (15.1.1.3632)
- 188816** -- If "Require a value in the Company field" is checked, then users get an error when clicking on the Personal link in the public view. (15.1.1.3286)
- 189194** -- DONORCLUB records are inconsistently created. (15.1.1.3441)
- 189283** -- On a sitemap, the option "Open the link in a new window" does not open the "Content or URL to Link to" link in a new window. (15.1.1.3286)
- 190190** -- Not possible to change the attached content of a navigation item. (15.1.1.3152)
- 190815** -- When resolution is set to 1024x768, close icon for tool tips is off the screen. (15.1.1.3152)
- 190868** -- If you have VAT enabled for your organization, ALL public view created accounts will be tax exempt (have USE_VAT_TAXATION set to 1) (15.1.1.3064)

- 190873** -- For templated and Public sites on Firefox, users cannot delete documents from Communities. (15.1.1.3152)
- 190876** -- For all Communities sites supporting Firefox, OK/Cancel buttons erroneously appeared on the Document System window that lists uploaded attachments. (15.1.1.3152)
- 190882** -- If you create a new SSRS report and save it in the Reports folder for either Marketing or Process Manager, the report doesn't show up as an option when seen through the reports section of those tabs. (15.1.1.3152)
- 191099** -- Opt-out using Record Responses causes error. (15.1.1.3152)
- 191140** -- Add section divider does not insert divider between sections on the advanced search web part. (15.1.1.3286)
- 191167** -- Pre-release web parts were not functional. (15.1.1.3152)
- 191267** -- Slow Performance Especially When Editing Using Surf-to-Edit on Remote WCM Hosted Website. (15.1.1.3441)
- 191279** -- WCM sites will not import without error. (15.1.1.3508)
- 191523** -- Paypal payment URL changed to use the following URLs:
Test mode: pilot-payflowpro.paypal.com
Live mode: payflowpro.paypal.com (15.1.1.3152)
- 191982** -- The Company field is not editable when viewing a contact's Personal page in the webviews (full or public). (15.1.1.3286)
- 192090** -- Multiple edits in the WCM WYSIWYG Editor were not working. (15.1.1.3152)
- 192209** -- Error When Emptying Recycle Bin in WCM (15.1.1.3508)
- 192269** -- If the GUEST account is disabled, Login problems can occur. (15.1.1.3152)
- 192651** -- When doing a credit refund in iMIS, you get the error "Bad Parameter

Count: Name=nCCReturn" (15.1.1.3286)

193177 -- Cannot get access to Simple Order Entry (SOE) unless you are in the SysAdmin role. (15.1.1.3286)

193203 -- Some links on the public site use the admin.master file. (15.1.1.3632)

193313 -- When attempting to re-order navigation items in Site Designer by drag and drop an error occurs. (15.1.1.3441)

193522 -- Cannot add an attachment to an email merge. (15.1.1.3286)

193546 -- Miscalculated Guest Function Fees in the Public View. (15.1.1.3441)

193586 -- Unable to create new order from customer module (15.1.1.3286)

193628 -- Update scripts are not properly updating the standard ASI business objects. (15.1.1.3441)

193766 -- 15.1 Multi-Instance Tool Fails to Complete When iMISPublic Site does not Exist on Same Server. (15.1.1.3441)

193839 -- IQA Link is not available in Fundraising. (15.1.1.3441)

193847 -- Web View Search Feature Gives Error with Windows 2003 and Windows 2008 Server (15.1.1.3632)

194839 -- UserId Length Should be 60 on the User Business Object. (15.1.1.3441)

195127 -- There is a large gap on the create account page when Suffix, Informal, Designation and Title are not shown/used. (15.1.1.3286)

195392 -- Images Uploaded via iMIS 15 Application Server Image manager do not Display Correctly on Separate WCM Website due to Differences in Virtual Paths. (15.1.1.3632)

195412 -- Incorrect Local Publish Path Example Causes 404 Error When Publishing Content. (15.1.1.3632)

195597 -- When you enter a username that doesn't exist in the system for 'Forgot my password' in public view, you do not receive a friendly error. (15.1.1.3441)

195654 -- When a country only has one shipping method assigned, the other shipping methods shouldn't show up when someone from that country logs into public view. (15.1.1.3632)

196120 -- Unless you are assigned to SysAdmin role, you do not have access to Set Up Module or the Accrual Dues menu options in the Billing module. (15.1.1.3632)

196524 -- Any kit that is imported will backorder even when it should not backorder. (15.1.1.3632)

196735 -- Only six sub-nav items display under nav items in WCM. The rest are truncated. (15.1.1.3508)

198398 -- Parser error when registering for an Event in the Full View. (15.1.1.3632)

198870 -- A DataTable named 'Document' already belongs to this DataSet error message is generated when multiple users hit the iMIS web view roughly simultaneously while the site is still starting up. (15.1.1.3632)

199395 -- Level 8 system setup is required to grant module set up security levels. (15.1.1.3632)

200162 -- When editing content locally, url morphs from local server to remote server when you click on tabs other than HomePage (15.1.1.3632)

200175 -- In 15.1.1.3508, set up module under Billing is no longer accessible. (15.1.1.3632)

200688 -- Depending on the quantities of a product required in a kit, the number of available kits will show in fractions. (15.1.1.3632)

159316 -- An error is returned when Committee Export reports are requested for a SQL 2005 database set for compatibility mode 90.

160364 -- Entry of a Dues product code is allowed in the AR/Cash > Enter/Edit Sales Transaction line items.

173945 -- Unable to change passwords in User Credentials page.

183317 -- In a User Defined window, the Change Log is recording changes to fields of type Number when their value has not actually changed. The logged values are also being shown in monetary format.

191279 -- WCM sites will not import without error.

192209 -- Error When Emptying Recycle Bin in WCM

196735 -- Only six sub-nav items display under nav items in WCM. The rest are truncated

157556 -- The Edit icon on the Cart Items page does not function when paying for dues billing products.

159198 -- Full users who access the Public view are given access to fields regardless of the settings in the System Setup > Set up web components area.

160256 -- Change the allow account creation during Event Registration to reflect its real functions which is to turn the 'Add a coworker' button on or off.

162324 -- Coupon field on the Event summary page for the public view is not tied to any current functionality.

165092 -- If https is used for the base URL for Create account, the user will get an error when attempting to sign in from the email link.

166620 -- When you use the Process Engine to create a MS Word Merge object, neither the RUN option in design mode nor the 'Merge details' control work.

171352 -- Amending the System Setup (the tab, not the one from the file drop down)> Set up customer web components >> Reset password configuration, does not change the email subject, body and signature.

171500 -- Previewing content from the content record opens the published content not the content being worked on.

179961 -- In the public view, when adding dues to the cart, if you select the circle x to remove the item from the cart you get a dialog box asking

Do you want to delete all dues items?

If you select cancel it still deletes the item from your cart.

183871 -- Event Calendar Page "Jump To" Feature on iMISPublic View Fails with Error if Month Selected has 30 Days or Less.

185432 -- In the Public view on Firefox 2, the Add Info button on the Contact>Address page appears below the page footer.

185434 -- In the Public view on Firefox 2, buttons and messages appear below the page footer when creating an account.

185436 -- Editing a Nav item or Website in the right pane does not update the treeview with the Working indicator on save.
If you select a Published nav item or website in the treeview, and edit it in the right pane, when you click Save the treeview is not updated with the red bar indicating a Working version.

185455 -- If the user edits an Email Merge and changes its name, after doing a save and closing the Email Merge window; the document system screen is not refreshed and the old name is still displayed.

185459 -- OK button has no function on the Tagged List Format Preview window

185471 -- When several date filters are next to each other in Process manager reports, it's hard to distinguish the begin/end groupings.

185475 -- Server error trying to save a query without a name in ISA>IQA

185478 -- workflow monitor - refresh issues deleting job

185498 -- When you save an IQA generated report to the document system, you aren't prompted if the report name already exists.

185500 -- The Save, Save As and Close buttons at the top of the IQA popup window are all different sizes from each other.

185539 -- Clicking multiple times on a column header to re-sort a column after the initial sort click will not reverse the sort order.

185641 -- In Opportunity under the Action Plan tab, when adding a User Defined task to a future stage, the New Task button is greyed out. It will only show for an

active stage.

185875 -- Upgrade to 15.1 fails with databases containing two custom tabs

186037 -- Create Account Email Link in Template Gallery Site Does Not Work.

186069 -- Check All does not check the top level tags.

186075 -- In Content Designer, Go to Tagged List Format and open the Short tagged list format.

Notice that ShannonUDF is listed.

186193 -- Double-clicking folder in right pane causes error.

186291 -- Migrating content from eCM5 to WCM will result in apparent multiple copies of some content records.

186309 -- Set Group Names to be the same as Member Types prior to upgrade of a database from 15.0.3 to 15.1. The upgrade will fail in the CreateMemberTypeSecurityGroups.sql with a primary key violation.

186499 -- Featured Products out of alignment with rest of store

186501 -- The Full web view and template gallery site has formatting problems in the store.

186512 -- Heading for 'Featured Products' just says 'Products' which doesn't make it stand out from the 'Products' section below.

186610 -- Running Repair on iMIS15 Application Server From Control Panel > Add/Remove Programs Over Writes Web.config File with Invalid Values.

186631 -- Error creating html content

186816 -- First alteration in Site Designer of the Home Welcome page results in an error.

186830 -- The second instance of the PublishService.exe.config that is copied over from the default site retains the port information of the original instance. The default is <channel ref="tcp" port="15151">, as a result the second instance will

fail to start.

186980 -- Exports data limited to 500 irrespective of the IQA query results set.

187010 -- Stylesheets Have Gap in Image When Text Wrapping Occurs.

187355 -- IMIS 15.1 Installer Incorrectly Reports Free Hard Drive Space Available.

187663 -- Key_contact used as an alias for iMIS ID, eliminates the ID completely from display.

187680 -- Hitting refresh during Process Manager data entry causes iMIS to crash and forces a reboot of the server.

187760 -- Adding a project causes a database lock that locks the entire system and never releases

188045 -- iMIS closes with an error when resizing windows in Business Object Designer.

188526 -- If Company Name, and hence Company Sort, is not populated for a record that "Is a Company" customer type, then you will get an error when creating User Credentials. This is new to 15.1.

188689 -- 'Add a coworker' is not creating the associated customer record and credentials correctly.

188700 -- User who is assigned to the Company Administrator role doesn't see the 'Register someone else' option when registering for an event in the webviews.

190017 -- The Access Settings for a new content record that you create are not copy-heriting the access settings of the parent content folder.

(Previous to 15.1)

47708: The State Code Table has West Virginia misspelled. (15.0.3.2362) 149807: The ASP.NET eCM sitemap file causes errors when viewed. (15.0.3.1987) 156619: Removing a member for an owner role will remove that member for all other owner roles for the project. (15.0.3.2005) 157556: The Edit icon on the Cart Items page does not function when paying for dues billing products. (15.0.3.2399) 157912: IQA export ignores required filters when saving. (15.0.3.1987) 158440: You cannot remove Owner Roles from a Process Type. (15.0.3.2025) 158828: Once you create and save a design-mode Universe query for a job, you cannot edit it. (15.0.3.2005) 159000: Login times are slow when logging into remote iMISPublic server. (15.0.3.2332) 159090: Slow login on remotely located iMISPublic/eCM application server. (15.0.3.2332) 159516: Expiration date gets set to 7 days for new accounts created through the Public view regardless of the web components setting. (15.0.3.2042) 159984: *iMIS* web components cause .NET

application error and incorrectly created URL on ASP.NET eCM site using the default website and not using a virtual directory. (15.0.3.2042) 159992: In webviews, the Order History > Detail page needs to break down VAT or GSTINC tax amounts. (15.0.3.1987) 159995: In webviews, the Order History detail page does not correctly break down the VAT or GSTINC tax details. (15.0.3.1987) 160171: Poor performance on remote located iMISPublic / eCM ASP.NET website using IWC components. (15.0.3.2332)

160167: Previously, batches created with a blank cash account field could not be edited, because there was no way to enter the required cash account field. You can now edit and save these batches if you have an AR security level of 3 or above. Note: If you edit a batch to change the cash account, only receipts entered after you save will reflect the new account and associated GL account information. (15.0.3.2389) 160449: DBRepair throws an error for the AccessArea table but no functionality seems to be impaired in iMIS. (15.0.3.2005) 160673: Clicking new order from history crashes Customer Portfolio. (15.0.3.2389) 161287: If language setting is set to a User-Defined language in Internet Explorer, you are not able to place an order or register for an event in the Public view. Proxy filters often will set a client's language setting to 'en-secrid' which is a non-standard language that will cause problems for someone trying to view a Public view. Also, if a language setting is set to something other than English (but not User Defined), it will not let you register for an Event. (15.0.3.2396) 161496: When you display the Plan window for an event function and click on Edit, the wrong record's details are initially presented, and you must click Edit > Cancel > Edit to view the correct information. (15.0.3.2389) 161533: When GSTINC is selected for the event, the Resend confirmation email advises GST (included in price) when it is GST exclusive. (15.0.3.1987) 162544: Changes made to Content Area content on template gallery sites will show the latest updated record in all Content Area sharing the same name (i.e. Content Area 5 under About and Education). (15.0.3.1987) 162932: The view all link causes a 404 error on asp.net sites. (15.0.3.1987) 163039: Security issue with cross site scripting on login.aspx. (15.03.2024) 163439: In iMIS Desktop, the navigational buttons for the top toolbars are shifted to the left and not visible to users. This occurs when a user with access to specific modules switches between Customers and Events. (15.0.3.1987) 163919: Disabling and Enabling FK Constraints using the DBRepair utility will generate errors on the table. (15.0.3.2005) 164261: Receive an 'Unexpected error' when a Segmentation job is cloned that contains a Universe. (15.0.3.2005) 164337: If a new user defined task is added in the Action Plan tab using the New Task button, the created task no longer shows in the Stage Plan itself. (15.0.3.2005) 164412: Forgot My Password Link on ASP.NET Content Manager Site causes .NET Error When SSL Is Enabled For Login. (15.0.3.1987) 164482: Enabling SSL for the login in *iMIS* causes Server Error on Content Manager site during logon. (15.0.3.1987) 165138: When registering for an event on the public site, if the user clicks the headers for each section as opposed to Next the choices are not retained. (15.03.2024) 165066: Find me email references password but does not send one. (15.0.3.2362) 165608: If the quantity entered during event registration in public view is greater than 1, the tax amount shown is incorrect. The correct tax is shown for the first quantity, but no tax is shown for additional quantities. (15.0.3.1987) 165710: Access Keywords are cleared when switching a user from Full to Casual or vice-versa. (15.0.3.2396) 165716: Edits to payments in Service Central cause the Trans record to be rewritten with a blank OWNER_ORG_CODE field, and Due To/From entries are not created. (15.0.3.2005) 166010: In the public view, the Summary.aspx page does not display GST tax if the event and function are set up for GST without PST. (15.0.3.1987) 166057: Entering a negative credit card payment from iMIS Desktop results in an error preventing a refund to be sent to Paypal. (15.0.3.1987) 166302: Issues with apostrophes. (15.0.3.2332) 166537: If you use a segmentation definition as the source list for a campaign source code output generation fails. (15.0.3.2005) 166630: The script in Utilities > Report Specs for System-System Setup- Rebuild Name_Address Pointers does not include updates for the Preferred Shipping Address. (15.0.3.2362) 167192: All Committees appear in the Directory in the Public View, regardless of the 'Show on Web' checkbox or settings in the Notes area of the Committee Code setup. (15.03.2024) 167204: Importing multiple addresses through the Import Utility generates a primary key error. (15.0.3.2005) 167246: When converting an order (or a group of orders) with a large number of order lines for stock products, partial updates are done without an error being returned. (15.0.3.2042) 167267: 404 Error When Updating Address with SSL for Login Enabled on Content Manager ASP.NET Site. (15.0.3.2042) 167606: When an organization's Name contains an ampersand, it causes an error to be returned from PayPal for all credit card transactions submitted through the web views, and payments are written to the iMIS database but not completely processed in VeriSign. (15.03.2024) 167953: Auto-enroll functions can be unchecked by the registrant on the public view. (15.03.2024) 168006: Event search in

public view. (15.0.3.2042) 168168: Get an error when performing an export from IQA if the query does not have a prompt. (15.0.3.2005) 168281: Results will not export if there is more than one prompt on a query. (15.0.3.2005) 168297: Survey questions tied to functions are always displayed. (15.03.2024) 168310: Unable to Edit Shipping Address During Checkout with SSL Enabled. (15.03.2024) 168321: When a site is set up for Canadian tax, the VAT fields are displayed on the Public view under Personal Info regardless of the checkboxes in System Setup > Set up customer web components > Personal Info. (15.03.2024) 168951: Guest Registration should allow you to add the Company and/or the Position of the guest in the registration process. (15.0.3.2332) 168969: CP Error Updating Member Type. (15.0.3.2042) 169690: Build All user defined table tables causes corruption to the user defined tables Business Objects. (15.0.3.2042) 169941: When a payment is entered in FR > Process payments, you cannot edit or retrieve it. (15.03.2024) 170090: Process Manager process types cannot be deleted. (15.0.3.2025) 170254: Activity amounts display as dates in the staff view. (15.0.3.2042) 170436: Member type dropdown in iMIS Webview Contact > Personal will display the wrong member type and can result in the member type being incorrectly updated. (15.0.3.2025) 170478: Date picker on the event web component is not popping up within an ECM template. (15.0.3.2042) 170507: Changing type's Process Class after creating process causes errors trying to open pre-existing processes of same type. (15.03.2024) 170518: When adding a new member through Events registration, if you override the registrant class during entry of the registration, the pricing will be stored incorrectly. (15.0.3.2362) 170624: Add a co-worker paging is failing under the alpha listing during event registration. (15.0.3.2042) 170840: Master products price is 0.00 on the public view for non-logged in users. (15.0.3.2362) 171641: Product description summary available in 15.0.1 has been lost in 15.0.3. (15.0.3.2332) 172017: An error is returned if you attempt to enter a payment in Service Central and apply it to an order that has already been partially paid and invoiced. (15.0.3.2332) 172226: Confirmation Email Causes Error During Checkout When the Email Address has a Hyphen. (15.0.3.2332) 172796: Description meta tag is not included on content records that use tagged page layouts. (15.0.3.2362) 172972: Sitemap Causes Error in Non-Template Gallery ASP.NET Sites. (15.0.3.2332) 173672: Process Orders is not available in Service Central if the ORDERS is not in the license. (15.0.3.2362) 174181: When two Automatic event functions have the same CONFLICT CODE, the conflict is reported and user cannot proceed with registration; conflicts on automatic functions should be ignored. (15.0.3.2362) 174347: In Cash Receipts, the Custom credit card gateway saves a DECLINED transaction without giving the user a chance to update the incorrect values and submit the transaction again. (15.0.3.2042) 175205: SumActivityAmount doubles if you have multiple salutation in a record. Note: Users will have to modify the Search field of the report specs by adding (without the quotes) "AND Trans.SALUTATION_CODE = Name_Salutation.SALUTATION_TYPE" after the text "LEFT OUTER JOIN Name_Salutation ON Trans.BT_ID = Name_Salutation.ID" or delete and recreate any affected reports so the .ocx replaces the search for them. (15.0.3.2362) 175827: Auto generated batches are out of sequence. (15.0.3.2362) 175915: Edits to payments in Service Central cause the Trans record to be rewritten with a blank OWNER_ORG_CODE field, and Due To/From entries are not created. (15.0.3.2362) 176416: Tagged pages marked as members only that use the html component will not display the content after logging in. (15.0.3.2384) 176508: French Canadian language settings causes issues checking out on the public view.
